Rainbow Lorikeets

Rainbow Lorikeets look beautiful because they look like a flying rainbow

They are an amazing sight because it is so cute to see a tiny flying rainbow

Baby rainbow lorikeets are cute, when they hatch out of the egg they cheep!

I like when these tiny flying rainbows visit me at my home

They are pretty but really noisy when they are in the trees eating tasty things

Rainbow lorikeets are related to dinosaurs because some dinosaurs had feathers.

They are sometimes messy in their nests

Maybe they use their feathers to line their nests.

At my mum's house there are special trees which the lorikeets just love

The trees have special flowers which they sometimes enjoy eating

Sometimes the rainbow lorikeets drop the flowers from their sharp beaks

The soft flowers look dreamy as they float gently down through the air.
